Ruben EXHIBIT #14

Declaration of Elizabeth J. Haanes

I, Elizabeth J. Haanes, declare and state as follows:

1. I have been employed by Sterne, Kessler, Goldstein & Fox (SKG&F) since May 1999, and I am currently an attorney in the Biotechnology Group. Human Genome Sciences, Inc. (HGS), assignee of the present application, is a current client of the firm. I am the undersigned attorney of the "*Prima Facie* Showing of Entitlement to Judgment Under 37 C.F.R. § 41.202(d)" ("the showing") and "Request for Interference With A Patent Pursuant to 37 C.F.R. § 41.202(a)." The present application and the application involved in Interference 105,077 are both assigned to Human Genome Sciences. The law firm of Sterne, Kessler, Goldstein & Fox is handling both matters.

2. I have personally reviewed each of the declarations being submitted with the showing. I have also personally reviewed each of the various other Exhibits referred to in the declarations and the showing. I can attest that the declarations are authentic copies of previously executed declarations. I have reviewed the files of Interference 105,077 which stated that the declarations were served on opposing counsel as part of the Junior Party's Evidence on the Issue of Priority and/or Derivation on June 25, 2004 in connection with the ongoing interference between Wiley's 5,763,223 patent and Ruben's 08/816,981 application. The declarations are identical except for the following clerical modifications made by persons working under my direction. Cover pages referring to the present application have been added to the declarations, and the Exhibit reference numbers throughout the declarations have been redacted and replaced with the Exhibit numbers referred to in the showing. I can further attest that Exhibits RE18 to

RE153 and RE157 to RE158 referred to in the declarations, as well as in the showing, are authentic copies of the corresponding exhibits referred to in the above-referenced interference (see Exhibit A). However, the designation of the Exhibit numbers was changed from RX2018-RX2153 and RX157-RX2158 in Interference 105,077 to RE18-RE153 and RE157-RE158 in the present matter.
